Create flask:

The screenshot shows the Visual Studio Code interface. On the left, the Explorer sidebar displays a file tree with a folder named 'FLASK' containing files like '__pycache__' and 'app.py'. The main editor window shows the code for 'app.py' with the following content:

```
1  from flask import Flask
2
3  app=Flask(__name__)
4
5  @app.route("/")
6  def hello_world():
7      return "<p>Hello World</p>"
```

Run flask:

The screenshot shows a terminal window with the following output:

```
C:\Users\91638>cd C:\IBM\flask
